

Retrieval Medicine Program

Faculty of Health Sciences and Medicine, Bond University
Royal Flying Doctor Service (Queensland Section)

The Faculty of Health Sciences and Medicine and the Royal Flying Doctor Service (Queensland Section) are pleased to announce a new Postgraduate course dedicated to the unique specialty of Retrieval Medicine. The course will have multiple exit points as follows:

- > Graduate Certificate in Retrieval Medicine (4 subjects)
- > Postgraduate Diploma in Retrieval Medicine (8 subjects)
- > Master of Retrieval Medicine (10 subjects)

*'These programs will offer
a uniquely different
postgraduate experience.'*

Delivered as a partnership between Bond University's Faculty of Health Sciences and Medicine and the Royal Flying Doctor Service (Queensland Section), the program will be conducted in part-time mode using a flexible and interactive online delivery method as well as an intensive 3-4 day residential component each semester. The residentials will be conducted in a range of venues including off-site Royal Flying Doctor Service bases and the Faculty's teaching facilities.

Designed for health professionals working or planning to work in this area, the program aims to equip students with advanced skills in, and an excellent understanding of, all aspects of the challenging field of retrieval medicine.

One residential per semester is planned to accommodate the two subjects offered in that semester. The first residential component* of the program will be based at Bond University on the Gold Coast from 3-6 November 2012.

Entry Requirements

- > Undergraduate degree or equivalent in medicine, nursing or paramedic science
- > Current Australian or New Zealand relevant health professional registration or equivalent

Program Structure and Subject Sequencing

Graduate Certificate in Retrieval Medicine	
Semester 1	
MREM71-101: Principles in Retrieval Medicine	10CP
MREM71 -102: Retrieval Physiology	10CP
Semester 2	
MREM71-103: Retrieval Environment	10CP
MREM71-104: Clinical Retrieval Medicine	10CP

Graduate Diploma in Retrieval Medicine	
Semester 3	
MREM71-201: Human Factors and Retrieval Medicine	10CP
MREM71- 202: Organisational Factors of Retrieval Medicine	10CP
Semester 4	
MREM71-203: Special Conditions in Retrieval Medicine	10CP
HPED71-201: Research Methods for Health Professionals	10CP
Master of Retrieval Medicine	
Semester 5	
MREM72-301: Retrieval Medicine Research Project A	20CP
Semester 6	
MREM72-302: Retrieval Medicine Research Project B	20CP

**Residential accommodation and travel costs will be in addition to the standard subject fees*

Faculty

The programs will draw together an expert faculty, both national and international, with representation from critical care and generalist practitioners chosen for their practical experience and teaching abilities. Faculty will include doctors, flight nurses, paramedics and non-medical personnel to ensure a truly holistic overview of the discipline.

‘Students will benefit from the highest levels of both academic and clinical expertise.’

APPLY NOW for September 2012

Subjects commence **Monday 10 September 2012.**
